ROSEVILLE SMILES

SERVICE CATALOG

Service Name **Clear Aligners**

ABOUT CLEAR ALIGNERS

We offer clear aligner therapy as a discreet, comfortable way to straighten teeth and improve your smile without traditional braces. Using custom-designed aligners and advanced digital planning, we make treatment convenient, effective, and tailored to your needs every step of the way.

A DISCREET APPROACH TO A STRAIGHTER SMILE

Clear aligners offer a removable, nearly invisible way to straighten teeth. At Roseville Smiles, Dr. Sri evaluates your teeth, gums, and bite to determine whether clear aligner treatment is appropriate for your smile.

How Do Clear Aligners Work?

Clear aligners are custom-made trays that fit closely over your teeth. Each set applies gentle pressure to gradually move your teeth according to your treatment plan.

You progress through a series of aligners and attend follow-up appointments so Dr. Sri can monitor your progress. Some treatment plans also require small, tooth-colored attachments to help guide tooth movement.

Are Clear Aligners Right for Me?

Clear aligners can address many cases of crowding, spacing, and certain bite problems. They may be suitable for teens and adults, depending on their dental health and treatment needs.

During your consultation, Dr. Sri will review your goals, examine your teeth and bite, and discuss your options. Some cases may require braces or referral to an orthodontist.

What Should I Expect During Treatment?

Consistent wear is essential. Follow your prescribed schedule for wearing your aligners and changing to the next set. Remove them for meals and for brushing and flossing, and follow the cleaning instructions provided.

You may notice temporary pressure or tenderness when starting a new set. Treatment length varies depending on the tooth movements needed and how consistently you wear your aligners.

Maintaining Your Results

After treatment, retainers help keep your teeth in their new positions. Follow your recommended retainer schedule and continue regular dental visits to maintain your smile.

Schedule Your Clear Aligner Consultation

Find out whether clear aligners are right for you. Call or text **(916) 781-3737**, or **request an appointment online** to schedule a consultation with Dr. Sri at Roseville Smiles.
