ROSEVILLE SMILES

SERVICE CATALOG

Service Name **Dental & Implant Crowns**

ABOUT DENTAL & IMPLANT CROWNS

A dental crown is like a protective cap that covers a damaged or weakened tooth. It restores the tooth shape, appearance , strength and function so you can chew comfortably and smile confidently.

MORE ABOUT DENTAL CROWNS

Our goal is to provide dentistry that is undetectable. We replace existing failing crowns and fillings with restorations that look and feel like your natural teeth. 99 percent of our crowns are made of porcelain (tooth colored).

We use state of art dental technology for our dental crowns. Instead of traditional impressions, we use a small camera to scan your tooth and create a 3D digital model quick, clean and comfortable for you.

Dental Crowns are recommended if your tooth is:

- Cracked or broken
- Stained and failing crowns
- Worn down
- Severely decayed
- Treated with a root canal
- Discolored or misshapen
- Functional problems

What to expect

1. First Visit - We prepare the tooth, take a scan and place the temporary crown.

1. Second Visit - We cement your custom made crown in place - strong , secure and ready to function efficiently.

For more information about Dental Crowns or to schedule a consultation with Dr. Sri, call our office at 916-781-3737 or Request an Appointment Online.
