ROSEVILLE SMILES

SERVICE CATALOG

Service Name **Kids Dentistry**

ABOUT KIDS DENTISTRY

Kids Dentistry (also known as Pediatric Dentistry) is a specialized branch of dentistry focused on the oral health of infants, children, and teenagers. It includes preventive care, education on proper brushing and flossing habits, treatment of dental issues like cavities, and monitoring the development of teeth and jaws. Pediatric dentists are trained to handle the unique dental needs and behavior of children, creating a safe and friendly environment to help them build lifelong healthy habits.

KIDS DENTISTRY

Helping Little Smiles Build Healthy Habits

Positive dental experiences can help children feel more comfortable caring for their smiles as they grow. At Roseville Smiles, we welcome families and take time to explain dental care in language children can understand.

Dr. Sri and our team work with parents to support healthy teeth, answer questions, and identify concerns early.

When Should My Child First Visit the Dentist?

Your child's first dental visit should take place after their first tooth appears and no later than their first birthday.

Early visits provide an opportunity to check development, discuss home care, and help your child become familiar with dental appointments.

Care That Grows With Your Child

Depending on your child's age and needs, care may include:

- Dental examinations and professional cleanings
- X-rays when clinically appropriate
- Assessment of cavity risk and preventive treatment needs
- Guidance on brushing, flossing, and food choices
- Monitoring tooth development and bite changes
- Discussion of habits such as thumb sucking or pacifier use

Dr. Sri will explain any recommended treatment and discuss referral to a pediatric dentist or orthodontist when appropriate.

A Comfortable, Supportive Visit

Please let us know about previous dental experiences, anxiety, sensory sensitivities, or other support needs. We can discuss ways to help your child feel more at ease and plan an appropriate approach.

Healthy Habits at Home

Help your child brush twice daily and clean between teeth that touch. Our team can demonstrate techniques and recommend a visit schedule based on your child's needs.

Schedule Your Child's Visit

Call or text **(916) 781-3737**, or **request an appointment online**. We look forward to helping your family care for growing smiles.
