ROSEVILLE SMILES

SERVICE CATALOG

Service Name **Smile Makeover**

ABOUT SMILE MAKEOVER

A smile makeover is a customized treatment plan that combines multiple cosmetic and restorative dental procedures to enhance the appearance of your smile—and more importantly, boost your confidence.

SMILE MAKEOVER

Your Smile, Your Style

A smile makeover starts with understanding what matters to you. Whether you would like to brighten your teeth, improve their shape, close gaps, or replace missing teeth, Dr. Sri will help you explore your options.

At Roseville Smiles, we plan treatment around your goals while considering your oral health, comfort, and bite.

What Is a Smile Makeover?

A smile makeover is a personalized plan that may combine cosmetic and restorative dental treatments. Some patients need a small change; others benefit from a more comprehensive approach.

Depending on your needs, options may include:

- **Teeth whitening** to lighten suitable types of discoloration
- **Dental veneers or bonding** to improve tooth shape and appearance
- **Clear aligners** to address appropriate alignment concerns
- **Dental crowns** to restore damaged teeth
- **Implant crowns or bridges** to replace missing teeth
- **Gum contouring or crown lengthening** to address selected gumline concerns

Dr. Sri will explain which treatments are appropriate and whether specialist care is recommended.

What Does the Process Involve?

Share your goals

Tell us what you like about your smile and what you would like to change.

Evaluate your oral health

Dr. Sri examines your teeth, gums, and bite. Any underlying dental problems will be considered before cosmetic treatment begins.

Review your options

We will discuss the proposed treatments, benefits, limitations, costs, and expected timeline. When appropriate, photographs or digital planning tools may help illustrate the proposed changes.

Plan your care

Treatment may take one visit or several stages, depending on your needs and any healing required.

Maintaining Your Smile

Daily home care, regular dental visits, and maintenance of your restorations help support your results over time.
